SURYA RAMAN

ENGINEERING LEADER. DOG PARENT. MOTORCYCLE ENTHUSIAST.

Toronto, Canada | suryaramansuresh@gmail.com |Website | LinkedIn | Github

Skills

Engineering Leadership	Product Roadmap	RAG Systems	AI Agents	Incident Management	Stakeholder Management	Budgets
Node.js	TypeScript	Elixir	PostgreSQL	OpenTelemetry	Kubernetes	Docker
Python	Golang	MySQL	MongoDB	Redis	Elasticsearch	Kafka

Work Experience

Engineering Manager | PagerDuty
JAN 2026 - PRESENT, TORONTO, CANADA

- Built an AI agent that triages customer bugs and security vulnerabilities and opens PRs when confident, **cutting open customer bugs by 95%**; every PR is human-reviewed, and about half shipped unchanged.
- Took over a team of 6 engineers, inherited a second team within six months, and now leading 11 engineers on public-facing platform services that sit on the critical path for adoption, traffic ingress, and the public ecosystem, **maintaining 99.995% uptime**.
- Set roadmaps and long-running initiatives with Product; work with partners and customers to resolve escalations.
- Managing several vendor relationships, **saved $300K annually** by cutting low-value spend.
- Serving as a **PagerDuty-trained incident commander** on the internal incident response rotation.

Engineering Manager / Early Engineer | yellow.ai
APR 2018 - DEC 2025, TORONTO, CANADA

- Owned and scaled the messaging infrastructure (channels and integrations) for the yellow.ai GenAI platform, **reliably processing 9B+ messages a year across eight geographies**; raised platform uptime to **99.9%** by eliminating single points of failure (geo database replication, database proxies, geo-steered load balancing).
- Progressed from Software Engineer to Engineering Manager, **growing the team from 6 to 16 engineers** through full-cycle recruitment and structured onboarding, **with 80% retention**.
- Engineered a self-serve RAG pipeline (using agentic chunking, vector databases) that **eliminated data ingestion wait times**.
- Partnered closely with Product, Business, and Customer teams to shape and deliver engineering roadmaps that aligned with organizational strategy and business outcomes.
- Led infrastructure efficiency efforts that reduced network egress, cross-AZ traffic, and resource waste, delivering **$200K+ in sustained annual savings**.
- Led WhatsApp Business messaging infrastructure on Kubernetes, **partnering with Meta** teams to drive **4× throughput** while **reducing monthly infrastructure cost by 88%**.
- Shipped OAuth 2.0/OIDC with PKCE and moved an internal monolith to versioned libraries (Nexus, Jenkins).

BI Developer | Visual BI Solutions (an Atos Company)
MAY 2017 - MAR 2018, CHENNAI, INDIA

- Built features and automation for the product “BI Hub” in Python, Java, and MySQL, integrating data tools for multiple enterprise clients.

Education

B.E. Computer Science and Engineering | Anna University
AUG 2013 - MAY 2017, CHENNAI, INDIA
