

SURYA RAMAN

ENGINEERING LEADER. DOG PARENT. MOTORCYCLE ENTHUSIAST.

Toronto, Canada | suryaramansuresh@gmail.com | [Website](#) | [LinkedIn](#) | [Github](#)

Skills

Node.js	TypeScript	Elixir	PostgreSQL	OpenTelemetry	Kubernetes	Docker
Python	Golang	MySQL	MongoDB	Redis	Elasticsearch	Kafka

Work Experience

Engineering Manager | PagerDuty JAN 2026 - PRESENT, TORONTO, CANADA

- Leading engineering for public-facing platform services that sit on the critical path for adoption, traffic ingress, and ecosystem reliability.

Engineering Manager / Early Engineer | yellow.ai APR 2018 - DEC 2025, TORONTO, CANADA

- Owned and scaled the complete messaging infrastructure (channels & integrations) for the yellow.ai GenAI platform, enabling the **reliable processing of over 9 billion messages** per year across **eight geographies**.
- Progressed from Software Engineer to Engineering Manager; Built and scaled high-performing engineering teams, leading full-cycle recruitment, structured onboarding, and successful integration of new hires.
- Built and sustained high-performing teams through hiring, onboarding, and clear ownership, maintaining **80% retention**.
- Partnered closely with Product, Business, and Customer teams to shape and deliver engineering roadmaps that aligned with organizational strategy and business outcomes.
- Led infrastructure efficiency efforts that reduced network egress, cross-AZ traffic, and resource waste, delivering **\$200K+ in sustained annual savings**.
- Engineered a self-serve RAG pipeline (using agentic chunking, vector databases), achieving a **100% reduction in customer data ingestion wait times**.
- Increased yellow.ai platform’s uptime to 99.9%** by eliminating Single Points of Failure across the system through **Geographical Database replication**, Database Proxies, and **geo-steered load balancing**.
- Led WhatsApp Business messaging infrastructure on Kubernetes, **partnering with Meta** teams to drive **4x throughput** while **reducing monthly infrastructure cost by 88%**.
- Implemented OAuth 2.0 with OpenID Connect (OIDC), Proof Key for Code Exchange (PKCE)** which allowed clients to access the yellow.ai platform via any OAuth 2.0 provider.
- Introduced **artifact management** with **Nexus**, converted an internal monolith into smaller libraries; Integrated this with a **Jenkins CI/CD** pipeline to do automatic **semantic versioning**.

BI Developer | Visual BI Solutions (an Atos Company) MAY 2017 - MAR 2018, CHENNAI, INDIA

- Delivered core BI features and automation for “BI Hub” using **Python, Java**, and **MySQL**, streamlining data tool integration and supporting multiple enterprise clients in a fast-paced Agile setting.

Education

B.E. Computer Science and Engineering | Anna University AUG 2013 - MAY 2017, CHENNAI, INDIA
